

ARCHIVES of ACOUSTICS

QUARTERLY, Vol. 41, No. 2, 2016

Research Papers

V. Vencovský, <i>Roughness prediction based on a model of cochlear hydrodynamics</i>	189
P.N. Dokmeci Yorukoglu, J. Kang, <i>Analysing sound environment and architectural characteristics of libraries through indoor soundscape framework</i>	203
J. Peng, P. Jiang, <i>Chinese word identification and sentence intelligibility in primary school classrooms</i>	213
H. Hafke-Dys, A. Preis, T. Kaczmarek, A. Biniakowski, P. Kleka, <i>Noise annoyance caused by amplitude modulated sounds resembling the main characteristics of temporal wind turbine noise</i>	221
M. Igras, B. Ziółko, <i>Detection of sentence boundaries in Polish based on acoustic cues</i>	233
C. Sun, J. Xie, Y. Leng, <i>A signal subspace speech enhancement approach based on joint low-rank and sparse matrix decomposition</i>	245
J. Kociński, E. Ozimek, <i>Speech recognition in an enclosure with a long reverberation time</i>	255
M. Kunicki, A. Cichoń, S. Borucki, <i>Study on descriptors of acoustic emission signals generated by partial discharges under laboratory conditions and in on-site electrical power transformer</i>	265
S. Žiaran, O. Chlebo, <i>Noise control transmission methods of the combustion engine by means of reduction of the vibration</i>	277
E. Carletti, G. Miccoli, F. Pedrielli, G. Parise, <i>Design, manufacture and characterization of an acoustic barrier made of multi-phenomena cylindrical scatterers arranged in a fractal-based geometry</i>	285
K. Marciniuk, M. Szczodrak, B. Kostek, <i>Performance of noise map service working in cloud computing environment</i>	297
Z. Dąbrowski, J. Dziurdź, <i>Simultaneous analysis of vibrations and noise in the task of minimizing vibroacoustic activity of machines</i>	303
D.I. Popescu, I. Cosma, <i>Traffic noise models for curved roads</i>	309
K. Mazur, M. Pawełczyk, <i>Internal Model Control for a light-weight active noise-reducing casing</i>	315
M.J. Kin, A. Dobrucki, <i>Perception of changes in spectrum and envelope of musical signals vs auditory fatigue</i> ..	323
A. Śliwiński, <i>On the noise hazard assessment within the intermediate range of the high audible and the low ultrasonic frequencies</i>	331

Technical Notes

W. Meddeb, K. Tadjine, <i>Assessment of exposure to noise of workers to a reinforcing bar rod mill ArcelorMittal Algeria</i>	339
A. Deptuła, D. Kunderman, P. Osiński, U. Radziwanowska, R. Włostowski, <i>Acoustic diagnostics applications in the study of technical condition of combustion engine</i>	345

Chronicle

A. Sęk, <i>Doctor Honoris Causa of the Adam Mickiewicz University for Professor Brian C.J. Moore</i>	351
The 10th EAA International Symposium on Hydroacoustics	355
XVII International Conference Noise Control 2016	375
